

# SUPPORT ISOBAR

Use this communication tool to support person-centred transitions of care.

**Safe.** Have you considered what support is required for the participant to transition safely?

**Understand.** Have you explained the transition process in a way the participant understands?

**Person-centred plan.** Does the plan for end-of-life consider the participant's goals and wishes?

**Prepare.** Has a Care Alert Kit been completed in readiness for transitions?

**Outcome.** Has a medical goals of care or advanced care directive been considered?

**Relationships.** Have the important people in the participant's life been involved?

**Team.** Have you involved and or informed all members of the healthcare team?

**Identify.** Have you introduced yourself to the person?

**Situation.** Have you identified the participant's current health issue or problem? When did it start?

**Observations.** Have you identified the participant's needs and risk factors?

**Background.** Have you provided the participant's social and health background?

**Assessment.** Is your assessment clear, concise and factual?

**Recommendation.** Is there an agreed plan for recommended ongoing care?
